Scan Wet-Ink™

Wet-Ink Roll Scanner

Using state-of-the-art technology Scan Wet-ink is designed to not absorb or smudge ink on a press sheet. The non-absorbency characteristics of Scan Wet-ink further reduces the possibilities of transferring cross-contaminants from one sample to the next, ensuring quality results.

Features

Scanner technology

- > State-of-the-art patent pending technology
- > Easy to clean of all contaminants
- > Resistant to cleaning agents and inks

Front support tray

- > Low friction reduces chance of ink transfer to the scanner bed
- > Helps prevent slipping of media through the scanner feed system
- > Foldable (low footprint)

Back support tray

- > Low friction reduces chance of ink transfer
- > Helps prevent slipping of media through the scanner feed system
- > Foldable (low footprint)

Monitor Arm

- > Ergonomically designed inspection workstation mounting system
- > Fully adjustable
- > Keyboard tray and mouse platform

Stand assembly

- > Sturdy design
- > Media Storage tray
- > PC mounting system
- > On wheels for easy moving

Benefits

- > Scans wet-ink press sheets
- > Will not absorb or smudge wet-ink
- > Lowest cost wet media scanner available
- > Low friction front and back support trays
- > Ergonomic design
- > Integrates with ScanTVS™
