Features ▼

Realtime dashboard

With comprehensive view of job states, comments and annotations, user load, and capacity.

Preflighting and file fixing

Makes sure problems are caught and resolved when files are received, not when they should be printing.

Integration

Connect with Web2Print (W2P), Management Information Systems (MIS), web forms and other systems easily via XML.

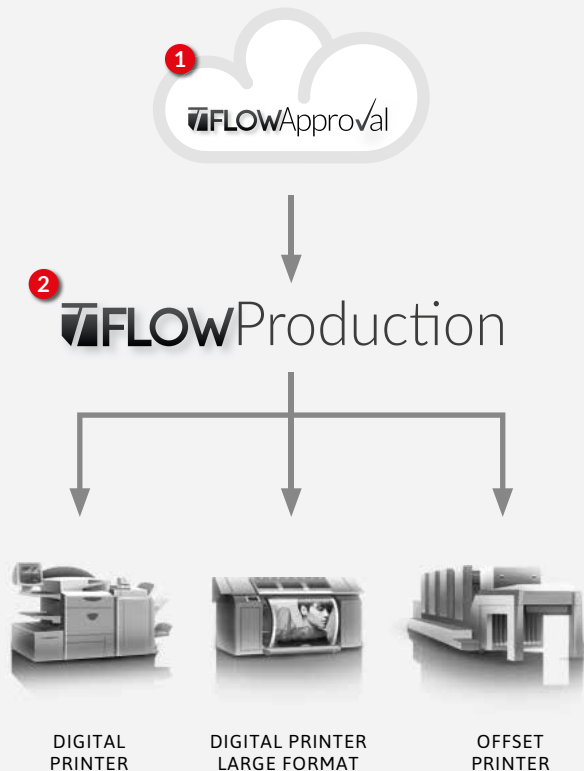

Adobe InDesign and Illustrator plugins

Makes job creation and delivery quick and simple. Automation starts here!

Automation ▼

Print-ready PDFs

Extend your workflow by connecting tFLOW Approval to tFLOW Production.

1 Approved files are automatically downloaded and processed by tFLOW Production.

2 Jobs are repurposed and distributed to corresponding printers.

tFLOW Approval can be used as a standalone system, or connected to tFLOW Production for fully automated file download and processing.

tFLOW Approval

Principal Functions

- Approval allows unlimited users - no additional user or connection fees.
- Shorten review cycles.
- All files, revisions, and comments are stored in one place, reducing email traffic and confusion.
- Check file quality as early as possible in the process avoiding quality issues in production.
- No installation required on client side.
- Review on any device, including mobile devices.
- Short learning curve for both administrators as well as users.
- Easily integrate with MIS, Web2Print, or automation workflows (including tFLOW Production).

Technical details

- HTML 5 Interface.
- Apache 2.2 with mod enabled rewrite.
- PHP 5.4.15 with standard extensions enabled. Modified php.ini config to increase post and upload size.
- PostgreSQL Database.
- PGAgent managed by Postgres (Scheduler).
- SMTP account for managing email alerts.
- Callas PDF Toolbox for PDF Preflight and images.
