tFlow Production -
How to enable the separation creation

Microsoft Windows 7, 8, 8.1, 10 and Srv 2003, 2008, 2011 (32 – 64 bits)
rev 1.5   8-28-2015
author: AP
maintainer: AP

How to enable the jpg preview of separation in tFlow

1. Go to folder:
   - Windows
   C:\tFlow repository\datasets\commandsets\templates\in
   -MAC
   \tFlow repository\datasets\commandsets\templates\in
2. Edit with a text editor the file "template_in.xml"
3. Go to last section and uncomment it
4. Save the file and close editor
5. Run Turbine and tFlow
6. Edit the preferences of each input queue and save it to refresh the settings
7. Done

In order to disable the separation creation then follow the same procedure but when at point 3 just comment that section.

Important: Always remember to edit the queues preferences to refresh the command set.
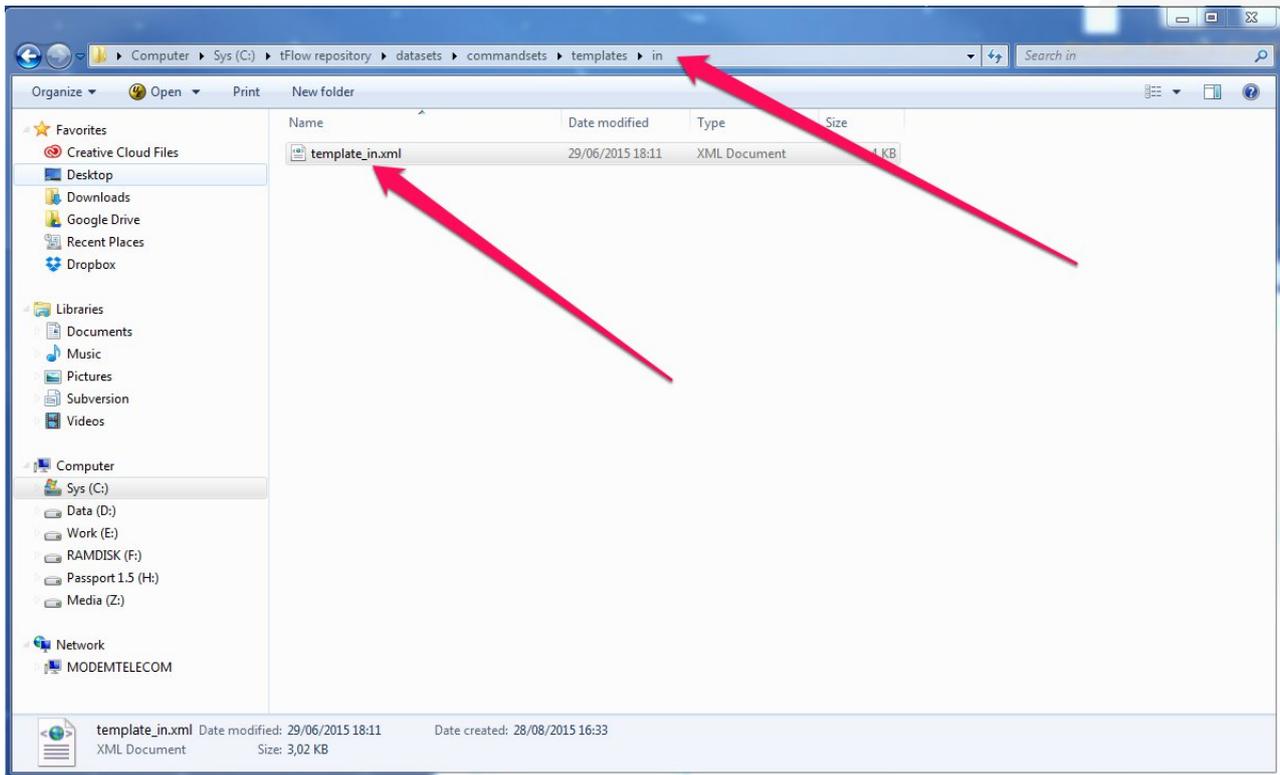

File Edit Search Insert Project View Format Column Macro Scripting Advanced Window Help

C:\tFlow repository\datasets\com...
