

# tFLOW

## AUTOMATED PREPRESS WORKFLOW

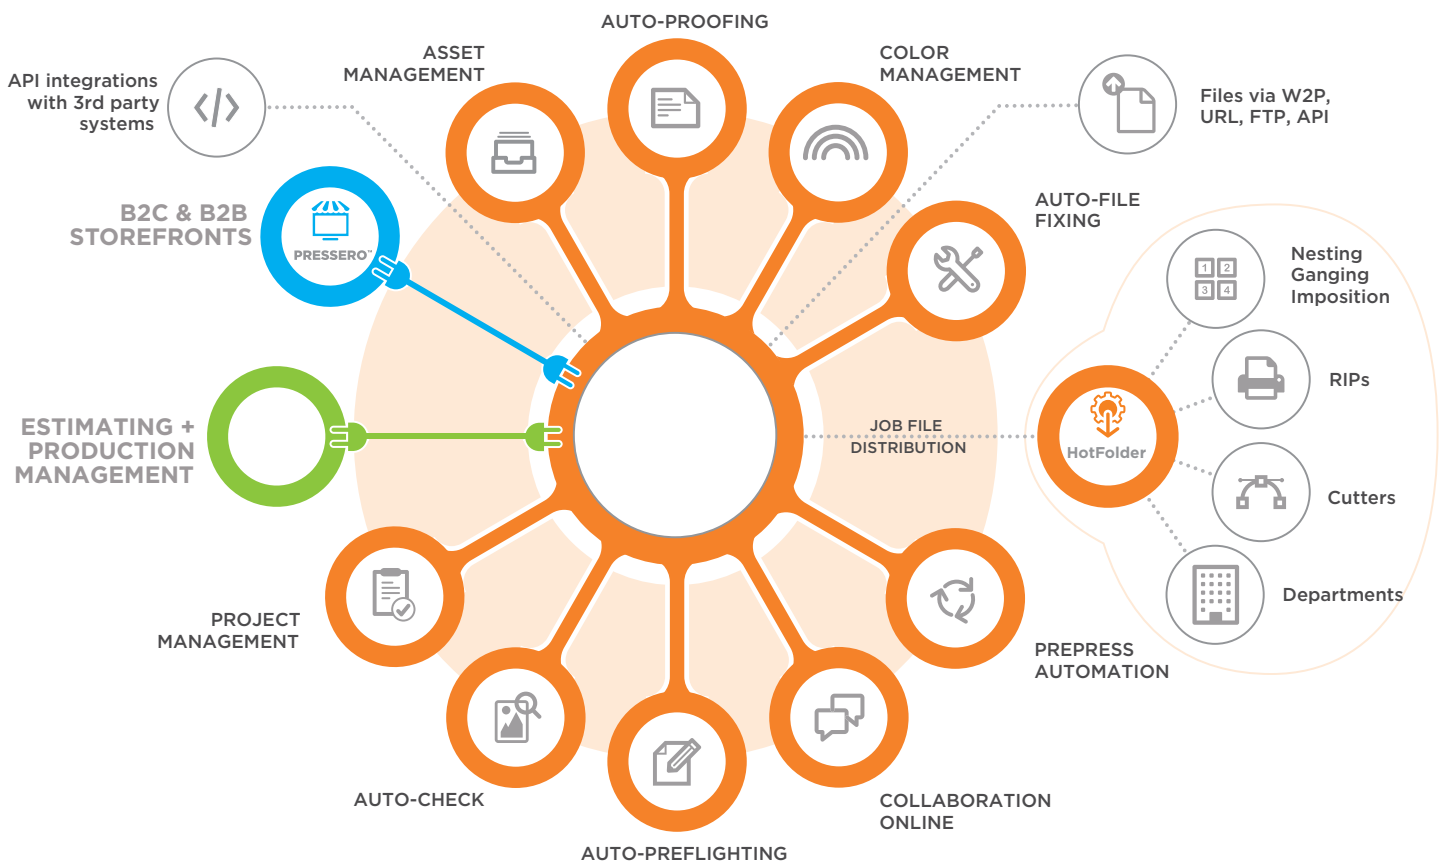

Manage customer jobs, files and deadlines easily and quickly

Aleyant tFLOW simplifies difficult file management tasks and processes to optimize efficiency and production throughput, by providing:

- Online preflighting and collaboration
- Automatic proof creation
- File submission
- Asset and project management
- File fixing and repurposing
- Automated prepress
- Color management
- Imposition
- Reporting

Aleyant tFLOW can **auto-receive files via your Aleyant Pressero™ Web-to-Print Solution**. Imagine having jobs automatically checked and fixed as they arrive instead of letting them pile up in your inbox. **Automatically send proof files** to your clients for approval. **Auto-send print-ready production files** to specific departments, or 3rd party imposition, RIPs, or cutters.

100%  
connectivity

Prepress  
automation

Eliminate  
errors

Auto  
Preflighting

Online  
collaboration

Increase  
profits

With management,  
design and pre-  
printing systems

Automate repetitive  
prepress tasks easily  
and quickly

It automatically  
proofs files up front  
for common errors

Files are not just  
checked, but also  
fixed automatically

You will be able to  
collaborate real-time  
making comments

tFLOW will  
allow you to run  
more and larger jobs

tFLOW eliminates  
redundant manual touch  
points and provides  
team communication  
tools for the 21st century

Use tFLOW's built-  
in collaboration, chat,  
and review feature with  
customers and your team to  
eliminate email chains, text  
messages and calls
