

The New Generation in Enterprise Proofreading is Here

Why automated proofreading?

It doesn't matter in what order the letters are.
The only important thing is that the first and last letter be at the right place.

Automated proofreading technology from Global Vision inspects all packaging components - text, images, Braille, barcodes & spelling in a fraction of the time of a manual process with 100% guaranteed accuracy.

All-in-one inspection of all packaging elements

Packaging isn't just about text.

What about graphics, barcodes, spelling and Braille? With apps to inspect different elements within your packaging, Proofware is the 1st all-in-one inspection solution that has all your packaging covered.

Inspect Word files, PDFs, UPC codes, Data Matrix and more in seconds.

No hardware. No software. No problems.

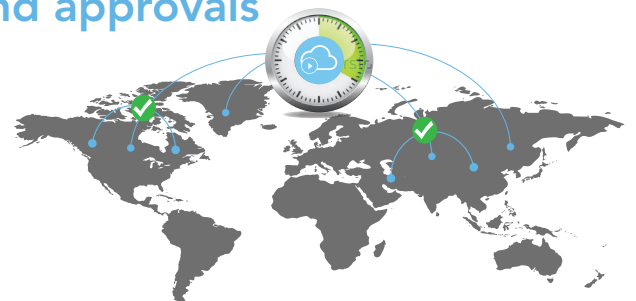

Just your browser. 100% true web-based technology.

With a simple web server deployment within your Intranet and no client software required, Proofware gives access to the entire enterprise. No Citrix required.

For even simpler IT deployments and lower costs, choose the Proofware Cloud for fully validated and managed servers with full disaster recovery and guaranteed uptimes.

Speed up time to market and approvals

Get packaging artwork right the first time.

Proofware allows stakeholders to collaborate globally on inspection reports and catch errors early in the process for quicker approvals.

Route proofreading reports via e-mail and communicate through annotations.
