

The Platform Leading Organizations Trust With Their Websites

Built To Optimize Web Experience

Monsido's platform allows its users to take control of their websites. With its intuitive dashboard and set of powerful features, Monsido is truly revolutionizing the way websites are run.

About The Platform

Monsido works by scanning your website and finding errors and optimization opportunities which would have otherwise been overlooked. In addition to ADA accessibility issues, Monsido also finds broken links, misspellings, SEO issues, missing scripts, content policies and more.

Our Mission Is To Make Your Job Easier

We work closely with our customers to ensure we deliver what they really need to run their websites effectively. As website roles continue to change in today's demanding environment, websites need a solution which can be equally used by tech teams, content creators and admins alike. Monsido allows you to have unlimited users and delegate roles to each of them. With weekly reports and prioritization, your team saves hundreds of hours and important website errors are never overlooked.

-  Website Policies
-  Prioritization
-  Uptime Monitor
-  Web Statistics
-  Management
-  Search Engine Optimization

A Simple Solution For ADA Website Compliance

Monsido is a powerful tool which finds Section 508 and WCAG 2.0 issues on your website and reports them all in a user-friendly dashboard. Monsido isn't just about finding issues though. It is about making accessibility understandable. With its clear breakdown of issues and explanations of how to fix them, your entire team - regardless of technical ability and knowhow - will feel confident building a better, accessible website.

See Exactly How Your Website Is Performing

After your first scan, you will be able to see exactly how your website is performing in terms of accessibility. You can get an overview of performance in the dashboard or view all issues by guideline and compliance level. With this information, you will be able to set clear policies to ensure accessibility issues are fixed and never occur again.

Fix Accessibility Issues In Minutes

Monsido integrates with your CMS to save you time. Simply choose the issue you want to fix and Monsido will take you right to the page where it occurs. Your team will be able to fix accessibility issues with just a few clicks. If you aren't sure how to fix an issue, you can always check with our Help Center for instructions on how to proceed.

The Support You Need

At Monsido, we understand that most website admins are not accessibility experts. That is why Monsido has included an in-app Help Center which contains clear instructions on what the guideline is, steps on how to fix issues and even examples of code which pass/fail. Monsido also provides a variety of additional support including training guides, webinars and live support.
